EDUCATION

Yale University 2021–Present

B.S. Electrical Engineering and Computer Science, Expected 2025

- Cumulative GPA: 3.98
- Yale Dramatic Association—Production experience in lighting, sound, and technical design
- Yale Computer Society—Developing a web application for students to coordinate meetings
- Yale IEEE Chapter—Working with a large radio antenna and designing a wirelessly controlled LED system

EXPERIENCE

Homebrew 2020–Present

Technical Steering Committee Member and Maintainer

- Homebrew is a tool used by millions of software developers to manage software packages
- Strategize big-picture technical goals for the Homebrew organization
- Advise on technical disputes between Homebrew maintainers
- Implement features to improve user experience and efficiency
- Triage, review, and merge pull requests and issues
- Technologies: Ruby, Bash, Git, GitHub, and GitHub Actions

Yale University 2023–Present

Student Employee

- Schwarzman Center Event Technician—assist professional events and performances
- Theatre and Performance Studies Lighting Technician—execute the load-in and strike of lighting plots for department performances

Smartphone Needle Guidance Device 2021–2022

Software Engineer

- Developed an app to improve accuracy and speed in CT-scan guided cancer biopsies
- Aided in conducting a study that showed a statistically significant benefit in using the app
- Accepted for presentation at the Society of Skeletal Radiology's 2023 annual meeting

CWRU Institute for Smart, Secure, and
Connected Systems 2019–2020

Software Engineering Intern

- Developed an IoT device to monitor wheel wear on local transit cars
- Prototyped a LoRaWAN system for monitoring industrial power consumption
- Technologies: Python, Bash, Git, Ansible, AWS, MQTT, LoRaWAN, and Arduino
